NISHANT

ENTRY-LEVEL UNITY GAME DEVELOPER | GAME QA

+91 8708329800 | vstnishant154@gmail.com | India
LinkedIn: add URL | Portfolio: see included website

PROFILE

Entry-level Unity developer and game QA candidate with hands-on academic and personal project experience in 2D/3D gameplay, AR/XR prototypes, C#, and physics-based interaction. Familiar with functional and regression testing, bug tracking, and performance profiling. Interested in building playable, reliable experiences and supporting game teams through clear testing and iteration.

GAME JAM & PUBLISHED WORK

The Last Moment | BYOG Build Your Own Game 2026 | Unity | Team submission

- Contributed as Game Designer, Sound & UI for a Unity 3D platformer submitted to the 72-hour BYOG Build Your Own Game 2026 jam.
- Supported a fast-paced platforming experience built around movement, obstacles, and disappearing platforms.

Submission: View The Last Moment

Mall Mischief | Published game | Jabali Studio

- Published through the Jabali profile; colorful mall-themed gameplay experience.

Game page: View Mall Mischief

SELECTED PROJECTS

Sort It Out | Cooperative Multiplayer Game | Unity, C#, Netcode for GameObjects

- Two-player cooperative game where players collect and sort objects to complete tasks together.

Project: Play / download Sort It Out

Tap and Score | Snapchat Lens Studio | AR prototype

- Interactive AR game prototype with tap-based targets and score tracking. Snapchat Lens ID: 8f8bf608-1a89-40d7-912f-f89ed8d7bc37.

Unreal MetaHuman Motion Capture | Unreal Engine 5 | Motion capture study

- Explored MetaHuman workflows and motion-capture integration in Unreal Engine, from face identity setup to full character rig.

SKILLS

Game Development: Unity, C#, Unreal Engine 5, Godot, Lens Studio
QA: Functional testing, regression testing, bug tracking, performance profiling
3D & UI: Blender, UV mapping, Adobe Photoshop, spritesheets, UI design
Additional: C++, Python, JavaScript, AR/XR development, physics-based mechanics

EDUCATION

Bachelor of Engineering in Computer Science Engineering | Chitkara University | Game Development Specialization

Expected graduation: 2027 | Current: 6th semester | Relevant coursework: Digital Concept, 3D Art and Design, Unity, Unreal Engine

ADDITIONAL

Languages: Hindi, English | Gaming interests: Tactical shooters and action games
